Students usually work in oil, acrylic, watercolor or pastels, and may work in any medium they choose. They MUST supply their own materials and a portable easel. The first class will be conducted at an outdoor location so it is essential for students to register IN ADVANCE so that the instructor is able to contact everyone with the place to meet! Students must bring their supplies and easels to the first class. Some travel is involved so it is necessary for participants to have transportation. PLEASE NOTE THAT THIS IS NOT A BEGINNING LEVEL PAINTING COURSE. Students with limited painting experience should consider taking our basic Oil or Acrylic courses.

# **OTHER MEDIA**

## **Basics of Digital Photography**

(Ages 18 through Adult, AAH Second Floor Michener Gallery, 6 weeks)

This class addresses the basic techniques required to create meaningful photographs with a digital DSLR-style camera. It is intended for individuals who are new to photography as well as experienced photographers who simply want to create better photographs. The instructors are familiar with many different types of cameras and will work with you to help you understand YOUR camera. **Each participant should bring his/her camera, the camera instruction manual, and (at least one) lens.**

By taking this class you will learn how to:

- Handle your camera properly so your pictures are sharp (when you want them to be).
- Use your camera's different exposure modes (shutter priority, aperture priority, manual exposure) to achieve properly exposed pictures—under any lighting conditions.
- Use your camera's different focusing settings to accurately focus on both stationary and moving subjects.
- Use different focal length lenses to achieve different "looks."
- Compose a photograph so that it looks "dynamically balanced."
- Adjust the camera's shutter speed and the lens aperture for creative effects.

## **Introduction to Lightroom**

(Ages 18 through Adult, AAH Third Level, 9 weeks)

Adobe Lightroom is the premier software program that photographers both amateur and professional use to organize and process their photographs. This four-session class provides an overview of the program by answering these (and many other) questions:

- What are the main features of Lightroom?
- How can Lightroom help me find a photograph that I took years ago?
- What is the catalog?
- Do I also need Photoshop?
- Why is a "non-destructive" workflow important?
- Is Lightroom difficult to use?
- How do I get started?
- How can I give my photographs a more professional look?

This class is structured as a demonstration, so there is no need to bring a laptop. Contact either one of the instructors for more information: Joe Farrell: jfarrell@farrell-assoc.com or Dennis Baker: Dennis@DennisBakerPhoto.com.
